

Comparison of the final design to the original brief.

Brief Criteria	How the design fulfils this need
Haven of flora, fauna and fungi	Maintains a lot of the existing flora, planted crops and trees add to it. No use of chemical interventions creation of log piles and 'Froggie Hotels'
Space for people to share food and knowledge	Central area with space to sit and talk. Space for a small fire. Tippy Tap for improved sanitation
Productive Space	Makes use of sunniest areas for growing annual and perennial fruits and vegetables. No dig approach Use of mulch
No Chemical Inputs	Create own compost Hand weeding
A place the community can see is loved	Keep on top of weeds Creation of clear and attractive boundaries Creation of clear paths Signage
A feast for the senses	Scented plants Coloured plants Variety of crops Space to sit and listen
No Waste and sustainable	No dig approach Use of mulch Compost green waste Use of wood chop and onsite brash
Cost Free (minimal cost)	Use on-site materials Additional crops rescued from other sites Crops and trees by donation or grafted by the group
Solar energy to power a water source	NOT COVERED Have included capture of rainwater and use of canal water (manually collected) for irrigation
Biodiversity to LEAD the project	The existing flora and tree cover has sculpted the design.
Empower community with knowledge of Orchard and Forest Garden care	Space to talk and listen. Maintenance Plan and socials include chances to learn

Study boundaries of light requirements for Apple trees	Harvest records will provide a record of yield and tree health
To Study success of striking rootstock cuttings in near complete shade and various soil moisture levels	As above
